The financial statements are presented in Indian rupees.

1.2 Use of estimates

Actual results could differ from the estimates. Any revision to accounting estimates is recognised prospectively in current and future periods.

1.3 Current-non-current classification

All assets and liabilities are classified into current and non-current

Assets

An Asset is classified as current when it satisfies any of the following criteria:

- a. It is expected to be realized in, or is intended for sale or consumption in, the company's normal operating cycle;
- b. It is held primarily for the purpose of being traded;
- c. It is expected to be realized within 12 months after the reporting date; or
- d. It is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

Current Assets include the current portion of non-current assets.
All other assets are classified as non-current.

Liabilities

- a. It is expected to be settled in the company's normal operating cycle.

1. Significant accounting policies *(Continued)*

1.5 Impairment of assets

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired based on internal/external factors. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the statement of profit and loss. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount subject to a maximum of the depreciable historical cost.

1.6 Taxation

Tax expense comprises income tax (i.e. amount of tax for the period determined in accordance with the Income Tax Act, 1961), deferred tax charge or benefit (reflecting the tax effect of timing differences between accounting income and taxable income for the period).

Income tax

Provision for income tax is recognised based on estimated tax liability computed after adjusting for allowances, disallowances and exemptions in accordance with the Income Tax Act, 1961.

Deferred tax

The deferred tax charge or benefit and the corresponding deferred tax liabilities and assets are recognised using the tax rates that have been enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realised.

1.7 Earnings per share

The Company reports basic and diluted earnings per share in accordance with Accounting Standard 20 - Earnings Per Share notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014. Basic earnings per share is computed by dividing the net profit after tax attributable to the equity shareholders by the weighted average number of equity shares outstanding for the year.

Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue equity shares were exercised or converted during the year. Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares and dilutive potential equity shares outstanding during the year.

1.8 Provisions and contingencies

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that the outflow of resources would be required to settle the obligation, the provision is reversed.
